

My cel phone gets called repeatedly (up to 6 times a day for the past 2 months) by a fax machine at (916) 267-2700. These incomming cel phone calls cost me money. I have called several directory assistance operators and done several on-line reverse number searches to try to find out who owns the number and ask them to stop faxing my cell phone. But no one can find a listing for the number. This is not only frustrating, it is interstate theft and harassment. Can the federal government stop it? Please?
